Healthcare Information System (HIS Prototype)

Demo Link: https://github.com/sesweet/Implementation-of-Healthcare-Information-System/blob/main/Healthcare%20Information%20System%20Pressentation%20Slides.pptx

GitHub Link: https://github.com/sesweet/Implementation-of-Healthcare-Information-System

Key Features

- Add patient information (name, age)
- Schedule appointments for patients
- View patient and appointment lists
- Real-time updates on the screen
- Input validation to prevent errors

System Requirements

- A web browser to run an HTML file
- Doesn't require installation
- Runs using HTML and JavaScript

How it Works

User enters data → System processes input → Data is stored → Results are displayed

System Diagram

User → Input Form → JavaScript → Data Storage → Output Display
